

Visual Inspection Level- II According to ASNT

Course general description:

Visual inspection of welding joints is an essential technique in different industrial applications such as petrochemicals, oilfields, gas fields, power plants, transportation pipelines....etc. This course is one of the American society of nondestructive testing (ASNT).

Audience:

This course is designed for:

1. Mechanical engineers
2. Inspection engineers
3. Maintenance Engineers
4. Ships & marine spreads surveyors and inspectors

Course objectives:

By end of the course participants will gain:

1. Necessary qualification for visual inspection level-ii according to ASNT.
2. Knowledge and skills and qualify of participants in the following topics according to ASNT requirement: SNT-TC-1A.

Course duration:

5 days

Course location:

Cairo-Dubai-Istanbul

Course contents:

Day-1

- Introduction to NDT
- VT, UT, PT, MT & RT techniques
- Videos
- Q&A

Day-2

- Introduction to visual inspection
- Fundamentals of vision and light
- Q&A

Day-3

- Visual inspection equipment
- Sample of visual inspection tools and use
- Videos
- Q&A

Day-4

- Factors influencing visual inspection
- Videos
- Cases
- Q&A

Day-5

- Product technology (welding, casting, forging etc.)
- Videos
- Q&A

Day-6

- Welding defects & reasons
- Videos
- Inspection, weld repair and heat treatment requirements
- Q&A

Day-7

- Practical inspection methodology samples
- Videos
- Q&A

Day-8

- Specifications & codes
- Examples
- Q&A

Day-9

- Course recap
- Solving sample test

Day-10

- Report preparation
- Open discussion before test
- Posttest according to ASNT

Methodology:

- 60% lectures & concepts
- 10% Videos
- 10% Case studies
- 10% Exercises
- 10% Discussions
- Practical use of sample of visual tools

Course code: (TNDT001)
